

CLINICAL PROJECT MANAGER

Posted on 10 juli, 2024

Company Name Neoss

Location Göteborg

Job Description

Since 2000, Neoss® has been committed to advancing the science of dental implant treatment: designing, manufacturing, and selling the highest quality products which offer market-leading functionality. To continue developing this mission and providing a comprehensive solution for dental clinicians, dental laboratories, and patients, Neoss forms partnerships and invests in innovative, cutting-edge companies. Together, we are pioneering intelligently simple solutions.

Do you want to make a difference in the quality of life of dental implant patients? Then, you are welcome to join us as our new Clinical Project Manager.

The role

- Manage and coordinate the Investigator Initiated Study (IIS) program including development of investigator agreements and site contracts, manage study milestones, and financial aspects
- Manage the execution of clinical projects according to applicable guidelines, regulations, timelines and budgets, and in collaboration with external partners (i.e. investigators, researchers, CROs)
- Manage clinical data capturing and perform/coordinate data evaluation
- Assist in medical writing such as study reports, scientific articles, posters
- Monitor published data on Neoss products and compile data overviews

Your background

- Relevant medical/scientific degree, M.Sc. or Ph.D.
- Experience in clinical project/study management in an international setting, preferably from a medical device company
- Good knowledge in applicable regulations and guidelines governing clinical projects
- A person who is comfortable with all parts of clinical project management, and with the capability to drive a variety of clinical projects and study types and designs (e.g., company-sponsored studies, IIS, prospective/retrospective studies, pre-launch clinical activities such as ambassador programs/controlled market release programs, surveys, etc).

- Solution-oriented, hands-on person with an appropriate sense of urgency who believes it is important to adhere to established timelines, budget and quality goals.
- Good understanding in statistics, data management and scientific writing
- Proficient in English (verbal and writing)

The position is based at the office in Gothenburg with some possibility for hybrid work.

To apply

We are looking forward to receiving your application (in English) as soon as possible or at the latest on the **16 August**. Selection and interviews are ongoing, the position may be assigned earlier. For more information about Neoss, the role and to apply, please contact Emil Jakobs, Moveup Consulting AB, +46 70 264 98 93 or Tom Bergqvist at 0733 87 27 22.

CV sent by e-mail to: emil.jakobs@moveup.se

We are looking forward to hearing from you!

By submitting your application, you also give your consent to storing your personal information, including CV & Cover letter, and that we own the right to share this information with third parties (our client). You can withdraw the consent at any time

Om företag

***Neoss®** was founded in 2000, with the objective of "Advancing the Science of Dental Implant Treatment", by Fredrik Engman, Neoss Chief Technology Officer, and Professor Neil Meredith. Convinced that existing implant systems were too complex, their idea was to create a much simpler and more rationalized solution. Through persistent effort and close collaborations, they created a high-quality, optimized implant system. With a limited number of components, the Neoss Implant System has unique design features and a host of excellent advantages for everyone. Leading the market with ingenuity and integrity, we strive to set new standards. In developing smart treatment solutions and working closely with each practice, Neoss makes the complex less complicated. We call that Intelligent Simplicity.*

Since its foundation, Neoss continues to innovate and invest in research and product development: designing, manufacturing and selling products of the highest quality which offer market-leading functionality. Neoss implants, manufactured in Sweden, are protected by a number of significant patents including patents covering the NeoLoc® Implant-Abutment connection and the Neoss ProActive® surface which can be found on all Neoss implants.
