

VICE PRESIDENT - MANUFACTURING

Posted on 18 mars, 2024

Company Name Nanologica

Location Stockholm

Job Description

As Production manager, you will play a key role in driving the operational excellence of our company. Reporting directly to the CEO, you will be responsible for overseeing all aspects of Production (Supply chain management, Procurement, Production and Production planning, Logistics). We are working with an external CMO for our manufacturing of preparative silica and you are in the role as production manager also accountable for this relation. We are therefore looking for someone with technical skills as well as having the commercial knowledge required for this role.

This position is a Senior Management position, reporting to the CEO. Apart from a competitive remuneration package including bonus, you'll be part of building a world-class company together with very experienced colleagues. You will be an important part of developing the silica production of the future, hence contributing to more patients having access to vital medicines globally.

Your main tasks:

Production and Supply Chain Management: Ensure smooth and efficient production processes, optimize supply chain operations, and manage inventory levels to meet customer demand

Team Leadership: Build and lead a high-performing operations team, providing guidance, support, and professional development opportunities

Process Owner: The product that we manufacture are complex and therefore process development and oversight are key success factors

Establish new manufacturing: Our client has diversified its product range beyond silica and we are therefore looking to establish new manufacturing capabilities. Currently, all manufacturing operations are outsourced to third parties. However, as stability is achieved, there is potential to transition some or all of the manufacturing processes in-house, necessitating the construction of our own facilities.

Performance Monitoring: Establish and track key KPI's to measure the effectiveness of operational processes and implementing improvements as needed

Qualifications and Experience

- Solid experience in Operations (manufacturing/contract manufacturing, Supply Chain management, logistics, procurement). Preferably within the food or pharmaceutical industry
- Strong background in process chemistry and or API manufacturing
- Experience in managing operations in a global context, dealing with diverse stakeholders and cultures
- Excellent communication and interpersonal skills
- Fluent in written and spoken English
- Strong analytical and problem-solving abilities, with focus on data-driven decision-making
- Proven track record of successfully leading and developing cross-functional teams
- A degree in engineering or a related field is preferred

Swedish language is a requirement for this position.

To apply - send your CV to tom.bergqvist@moveup.se

By submitting your application, you also consent to us storing your personal data, including CV & cover letter and that we have the right to share this information with third parties (our client). You can revoke the consent whenever you want.

Om företag

With a foundation in materials science and nanotechnology, our client has developed an expertise in chromatography. A proprietary production method enables the company to precisely control the shape, size, porosity, and surface properties of silica particles, which provides opportunities to create first-class chromatography products.

The mission is to increase access to cost-effective drugs through its purification products, and thereby enable more patients around the world access to life-saving treatments for diabetes and obesity, for example.
