

SENIOR PRODUCT DEVELOPER - MEDICAL DEVICES

Posted on 22 mars, 2020

Company Name Oticon Medical AB

Location Göteborg

Job Description

Are you ready to make a difference for people with a severe hearing disability, and are you fueled by professional pride and curiosity? Are you skilled within the area of fine mechanics design and do you want to be part of developing new and innovative implantable hearing solutions?

Then we can offer you an exciting opportunity as a Senior Product Developer at Oticon Medical.

At Oticon Medical, we develop both Bone Anchored Hearing Systems (BAHS) and Cochlear Implants (CI). We are a fast growing and agile company. We are ambitious and possess an entrepreneur spirit and the will to win. We offer an opportunity to join us on our exciting journey and to help us develop innovative implantable hearing solutions that improve the lives of thousands of children and adults across the globe.

About the job

As a Senior Product Developer, you will be based in Gothenburg and part of Oticon Medical BAHS R&D. Our project activities are however distributed across several sites (Gothenburg, Copenhagen, Nice and Stettin), so multi-site cooperation will be a natural part of your daily work. Our project activities cover both development of new products and investigation and preparation of new technologies, and our project teams are typically multi-disciplinary and can include R&D, Operations, Regulatory, Clinical as well as Marketing. For our implant projects, the core development team will typically be located in Gothenburg.

Your focus will be to develop implants and accessories but also to act as specialist on all mechanical design with regards to manufacturability, robustness and best practice. You will work close with our research functions as well as our marketing department.

Successful in the job

For you to be successful in this job, we are looking on following skills and qualifications:

- B.Sc. or an M.Sc. degree in mechanical engineering/material science
- 5-10 years' experience working in hardware development projects.

- A strong detailed understanding of manufacturing processes in fine mechanics preferably within titanium or other types of metal
- Experienced working with technical documentation and have solid experience in 2D and 3D design
- Preferably experience working in a medical device company or other regulated industry
- Fluent in English (spoken/written)
- Some experience of collaborating and working with suppliers (in cooperation with our purchasers)
- An ability to identify and communicate areas for new products and product improvements to management.
- Experience in osseointegrated implants would be considered an advantage.

How to become part of us?

This recruitment is handled by our recruitment partner, Moveup Consulting AB. To apply, please send your CV and a cover letter to katarina.wanderydz@moveup.se

If you have questions regarding Oticon Medical or this open position, please contact Tom Bergqvist at +46 (0)733 87 27 22 or Katarina Wanderydz at +46 (0)738 55 44 51.
