

SENIOR PHARMACEUTICAL DEVELOPER

Posted on 26 maj, 2021

Company Name Emplicure

Location Uppsala

Job Description

Expanding our business, we need to strengthen our expertise in drug development / process development and project management with a **Senior Pharmaceutical developer**. You will work in a small team of internal and external experts and manage process related issues such as granulation, tableting, coating, etc. You will also work as a project manager and play an important role finding the right partner (CDMO) for the development and production of materials for clinical studies.

Your background

- Background from drug development either from a large pharmaceutical company or a small research company.
- Academic degree in chemical engineering or potentially a MSc. Pharmacy.
- Experience from working for or collaborating with a CDMO (Contract Development and Manufacturing Organization)

What can we offer

You will have a great opportunity to join early and develop in a company with really high ambitions. Our product portfolio has a strong potential and covers both professional and consumer healthcare. Taking part in all stages of drug development, partnering with external specialist and clients gives you an opportunity to develop and to take large responsibility. We offer competitive benefits and working conditions, flexible working hours and a creative environment in Uppsala Science Park.

For more information and to apply, welcome to contact our recruitment partner, Moveup Consulting AB. Send your CV and Cover letter to Daniel Kremer at daniel.kremer@moveup.se

By submitting your application, you also consent to us storing your personal data, including CV & cover letter and that we have the right to share this information with third parties (our client). You can revoke the consent whenever you want.

Om företag

Delivering drugs safely with less pain using ceramics.

Emplicure AB (publ) is a Swedish pharmaceutical company. We revolutionize the drug delivery by location and duration, giving patients a better and safer every day life, using the power in combining material science and pharma. Our innovative pharmaceuticals are all based on a large unmet medical need and existing pharmaceutical ingredients.
